

SAMATAR ABDIRAHMAN ALI

Data Administrator | Data Analyst

Phone: 0636558966 | Email: samataryare088@gmail.com | Location: Borama, Somaliland

PROFESSIONAL SUMMARY

ICT graduate specializing in Data Administration and Data Analysis, with practical project experience in SQL Server, Python, Excel, and Power BI. Skilled in database management, data validation, data cleaning, reporting, and business intelligence. Able to transform raw data into accurate reports and actionable insights to support data-driven decision making.

EDUCATION

Bachelor of Science in Information & Communication Technology (ICT) — Amoud University | 2022–2026

CORE SKILLS

Data Administration

SQL Server (T-SQL, Stored Procedures) • Database Design & Management • Database Security & User Management • Backup & Restore • Data Migration • Database Performance & Optimization • Data Integrity & Validation

Data Analysis

SQL (Advanced Queries) • Python (Pandas, NumPy) • Power BI (DAX, Data Modeling) • Excel • Data Cleaning & Transformation • Data Visualization & Reporting • KPI & Business Analysis

PRACTICAL PROJECT EXPERIENCE

SQL Server Database Management System

- Designed a relational database using SQL Server with tables, relationships, and stored procedures.
- Implemented data validation and integrity rules to support reliable database operations and reporting.
- Practiced database management, querying, and structured data organization using T-SQL.

Sales Performance Analysis

- Analyzed sales data using SQL and Power BI to identify revenue, product, customer, and performance trends.
- Created DAX measures and data models for sales KPIs and interactive reporting.
- Built an interactive dashboard to present analytical findings and support data-driven decisions.

Construction Project Data Analysis

- Analyzed construction project data including material costs, labor hours, and equipment usage using SQL Server and Python.
- Performed data validation and anomaly detection to improve accuracy of project budgets and expenditure records.
- Built Power BI reports to visualize budget variance, project progress, and material consumption.

Relational Database Design Project

- Designed a normalized relational database structure with tables, primary keys, foreign keys, and relationships.
- Developed SQL queries and stored procedures to manage and retrieve structured data efficiently.
- Applied database design principles to improve data organization, consistency, and integrity.

TOOLS & TECHNOLOGIES

Microsoft SQL Server • Power BI • Python / Jupyter Notebook • Microsoft Excel • Git & GitHub • Visual Studio Code

LANGUAGES

Somali: Native **English:** Professional Working Proficiency (Written & Spoken)
